## Seamlessly Integrating Poly Sun into TOG

After having obtained the approval resolution from the 16 June 2021 Extraordinary General Meeting of Shareholders to transfer the entire business of TOG's subsidiary, Poly Sun Company Limited, into the parent company, TOG, transitional steps were put into a robust integration plan, including communication to all staff, as well as to our business partners, suppliers and customers.

During the transitional period, all necessary compliance reviews and internal audits were undertaken, leading up to the transfer and formal dissolution of Poly Sun, which became official on 30th September 2021 as well as the liquidation. We are pleased to announce that the business has now been streamlined, with operations running smoothly, uninterrupted and fully integrated into the TOG organization and management teams, including Production, Purchasing, Sales, Supply Chain Management/Logistics, HR and Corporate Mission & Values.

This corporate milestone intends to capitalize on further business opportunities in the sun protection eyewear market, in line with TOG's plan for this sector. Beyond serving the basic needs of seeing more clearly and of eyesight correction, TOG has its sights set on combining its profound knowledge and expertise of vision care and eye protection with sunlenses, to provide a vast array of sunglasses and top quality sun-glare filter lenses.
