## TOG Engineering Contest 2021 Winners

Congratulations to our 7 engineers who reached the final round of our **TOG Engineering Contest 2021**. First and second places won Awards, and others received Commendation Certificates, whilst another 3 engineers won Popular Votes.

The teams and other participants benefited from over nine months of classroom training, coaching and mentoring sessions, job assignments, regular meetings and feedback, while working on their own design and improvement projects, to drive improvements in productivity and efficiency.

We hold their efforts and determination, as well as those of the other participants who did not make it to the final round, in the highest regard, for having delivered remarkable results.
